Another outfall related question.

Do you have in your files an updated NPDES for the Bremerton System which includes outfall managed under #22-002655 (soon to be #51-095956)?

I saw in file you sent over a 2010 NPDES Permit but not the newer one referenced in Outfall HSS Review. If do not have handy that is fine just want to make sure we are providing and referencing most current document we have in our possession.

Thanks!

Shayne

Thanks Lindie. Few more questions (for now) regarding outfalls.

In regards to OF-12-there was reference to a second set of sediment samples required for OF-12 due to dilution of 2015 samples. Abby's HSS memo remarks on poor sediment conditions found in area but we could not find actual record of 2nd round of sample results. Do you happen to have a copy of these sample results for OF-12 in your files?

Also, there was reference to outfall shown in photo below in marina file taken August 6, 2009 during a site inspection. You noted that this was a county outfall under stairs and that "Stephanie" had mentioned that this outfall releases a sheen during heavy rain events. Could you clarify who Stephanie is, whether this photo is of SOAL and if this is one of the CSOs listed on map I previously provided- perhaps OF-10?

Thanks for help in clarifying this information.

Subject: FW: BGW-104E Info Request

Hello Shayne,

As far as I know OF-9 and OF-10 do not extend onto state owned aquatic lands. You may want to double check with Darin Deehr in title and records to confirm that we don't have authorizations in these areas.

It looks like OF 11 is 51-046322. This is a perpetual easement at the end of High Street, Bremerton.

That portion of the harbor area situate in front of a portion of Section 14, Township 24 North, Range 1 East, W.M., of the Bremerton Tide Lands included within the limits of a strip 15 feet in width, having 7.5 feet of such width on each side of the following described centerline:

Commencing at the northwest corner of said Section 14, thence S 85° 42' 21" E 2661.81 feet to a point on the meander line per State of Washington Board of State Land Commissioners, Maps of Bremerton Tide Lands, 28 February, 1913 (page 5), said point being the true point of beginning, thence N 28° 36' 45" E 13.61 feet to a point on the inner harbor line, said point being S 85° 58' 19" E 2667.48 feet from the northwest corner of Section 14, thence N 28° 36' 45" E 147.20 feet to the terminus point of this centerline description.

There is also easement 51-045730 in that area of Bremerton. This is a perpetual easement for a sanitary sewer line which runs along the inner harbor line.

Subject: BGW-104E Info Request

Lindie,

I am working to complete the 104E information request for BGW. Attached is an image of outfalls I found in a Bremerton Sediment Study report (also attached for reference). Could you help me correlate which outfalls go with which agreement?

I have identified OF-12 as being under 22-002655 (soon to be 51-095956)

Still looking to correlate agreement number with;

OF-09

OF-10

OF-11

Please let me know if you are aware of any of these not crossing onto SOAL or if one is included with marina folder.

Thank you for your help with this as well as all the other help you have provided towards this effort.

I sincerely appreciate your knowledge and expertise on this matter.

Shayne
